SPECIALTY COATING SYSTEMS

ALX

Experience unmatched strength, durability, and design with ALX, Westcoat's waterproof deck coating system. Formulated for plywood surfaces, the ALX system integrates the finest acrylic resins and cement blends into a reinforced, galvanized metal lath. ALX eliminates plywood seams and is ideal for use in heavy traffic areas. Developed by experienced industry professionals, ALX is the first choice of the top deck coating applicators in the industry.

WP

WATERPROOF
RELIABLE MOISTURE BARRIERS

westcoat.

Rebuffs rain, snow, and spills.

Developed for plywood and concrete surfaces, our Waterproof Coat product line was created by some of the most experienced technicians in the industry and features the highest quality components for complete waterproof protection.

Durable and waterproof

The ALX system stands up to heavy traffic on balconies, corridors, stairs, landings, and interior floors. This durable waterproofing system protects plywood surfaces from the elements.

Quick-dry installation

Apply more than one coat per day with the ALX system; an acrylic cement mixture translates to faster drying times. Fewer installation steps can significantly reduce labor. The ALX system can be applied early in the building process, allowing other trades to complete painting and stucco prior to final finishes.

Strong, resilient and tough enough for hotels, condominiums, apartments, office buildings, and residential homes

By combining our Sheet Membrane, also known as Seal Guard, with 2.5 galvanized metal lath and a high polymer content, cracking and leaking is virtually eliminated. ALX offers strength without added weight; the finished product weighs approximately 2.5 pounds per square foot.

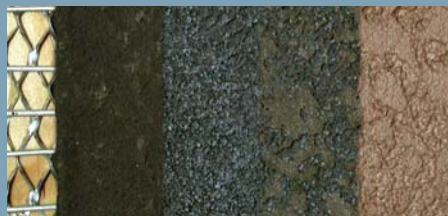

Excellent versatility

ALX is perfect for applications from the common to the decorative. A multitude of finishes and textures satisfies discriminating contractors, architects, and homeowners. ALX can be stapled through most old deck systems for easy rehabilitation of problem surfaces. ALX works as a waterproofing underlayment for concrete, stone, and tile. Also used for interiors, ALX can transform plywood floors into the look of concrete.

Advantages

- Field and lab tested since 1988
- Meets the AC308 criteria for walking decks
- Class A Fire Rating
- 1 hour Fire Test over 5/8" plywood substrate - ASTM E119
- Passed a wide variety of stringent tests for tensile strength, compressive strength, bond strength, abrasion, weatherability, chemical resistance, impact resistance and a 50 freeze-thaw cycle
- Provides early protection after framing
- Available in a variety of colors and patterns
- Mitigates plywood seam movement
- Environmentally-friendly finishes

With over 25 years of industry experience, Westcoat offers innovative, durable surface solutions for the discriminating architect, contractor, specifier, or property owner. Westcoat Specialty Coating Systems -- an all-inclusive line of step-by-step coating products -- make selecting the right process for every job even easier. Engineered to achieve superior results, Westcoat Specialty Coating Systems deliver numerous protective, texture, and decorative options for a variety of applications.
